

Privacy Policy

Last updated: April 9, 2026

Information we collect

Barz is a non-custodial platform. We do not require account creation, email addresses, or personal information to use the Platform.

Wallet addresses. When you connect your wallet and trade, your public wallet address is recorded on the Solana blockchain. This is inherent to blockchain technology and is publicly visible to anyone.

Usage data. We may collect anonymized usage data such as page views, feature usage, and session duration to improve the Platform. This data is not tied to any personally identifiable information.

Referral data. If you access Barz through a referral link, we store a cookie to track the referral for attribution purposes. This data includes the referral code, your wallet address (once connected), and trade count.

Information we do not collect

We do not collect names, email addresses, phone numbers, physical addresses, government IDs, or any KYC information.

On-chain data

All trades, positions, and payouts are recorded on the Solana blockchain. This data is publicly accessible and cannot be deleted or modified by Barz. This is a feature of decentralized systems, not a data collection practice.

Cookies

Barz uses minimal cookies for referral tracking and basic site functionality. No advertising or third-party tracking cookies are used.

Third-party services

Barz may use third-party analytics tools that collect anonymized usage data. We do not sell or share any user data with third parties.

Data retention

Anonymized usage data is retained for the purpose of platform improvement. Referral data is retained for the duration of the referral program. On-chain data exists permanently on the Solana blockchain.

Changes

We may update this Privacy Policy at any time. Changes take effect upon publication on this page.
